<b>02.</b>	Alumni Connect	<b>3</b>

## 7.2 Best Practices

### 1. Edible Landscape Garden

Goal:

1. Effectively segregate and utilize biodegradable waste produced on campus.
2. Raise student awareness about the dangers of improper garbage disposal and excessive pesticide use.
3. Advocate for and implement sustainable living practices.

The campus includes two hostels with dining facilities, which produce significant amounts of biodegradable waste. Additionally, the Food Science and Nutrition Department laboratories contribute to wet waste generation. To address this, the concept of an Edible Landscape Garden was developed.

This initiative aims to repurpose the campus's biodegradable waste effectively while serving as a live eco-project. The Edible Landscape Garden has been launched in partnership with the Eco Factory Foundation of Pravin Masalewale.

## 2. Alumni Connect – Motivating Students on the Path to Success

Goal:

1. Foster interactions between current students and alumni.
2. Provide insights into the professional journeys of alumni post-graduation.
3. Increase awareness among current students about opportunities for higher education and career paths after graduation.

Sessions conducted by alumni have proven highly beneficial for current students. These sessions provided students with direct insights into degree and diploma programs relevant to their specialization, both in India and abroad. Additionally, students gained valuable information about job prospects, entrepreneurial opportunities, and the preparation required for these paths. Alumni also enriched the existing curriculum by offering supplementary knowledge. Furthermore, well-established alumni extended internship and placement opportunities to students, enhancing their professional development.

Alumni Interaction- HECS Department- Ms. Gayatri Salve, an alumna of HECS interacting with students on career opportunities.
